

ABSTRACT OF THE DISCLOSURE

A clip having a main member with a first side, a second side, a first end, and a second end. A first substantially planar member has a first end connected to a first end of a second substantially planar member. The outside of the vertex formed by the substantially planar members is connected to the first side of the main member intermediate the ends of the main member. In use, the substantially planar members contact the rear and outside edge of a frame for a canvas. A short hook is connected to the first end of the main member and, in use, presses against the front of the frame. And a long hook is attached to a second end of the main member and, in use, presses against the inside edge of the frame. A variety of attachments may be made to the second side of the main member.
